

GLPI-PROJECT - Feature #1166

improve the rules engine for right assignment with a lot of rules

10/26/2008 05:59 PM - jmd

Description	
Reprise du commentaire de Remi sur le ticket : #1160	
If 10000 entities, evaluate 10000 rules on each login is probably impossible.	
Ideas :	
<ul style="list-style-type: none">- use ldap timestamp to check if running rules is needed- allow regex for ldap attributes (if ldap attribute match regex, set profile Foo-#0, set entity Bar-#1, for exemple).	
See [[ExtendRulesEngine]]

- *Status changed from New to Closed*

Regex for profile assignement is not mandatory. In fact, I've never meet this need.

#8 - 01/15/2009 08:58 AM - walid

(In r7819) see #1166 Add "Assign by TAG action" to computers affectation rules
