

GLPI-PROJECT - Feature #2125

Store & display user patronimic names

05/13/2010 03:07 PM - walid

Status:	New	Start date:	05/13/2010
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Authentication	Estimated time:	0.00 hour
Target version:	Unplanned		

Description

see <http://www.glpi-project.org/forum/viewtopic.php?pid=105377#p105377>

Need to review names_format management:

now :

- firstname / surname
- surname / firstname
- after :
- firstname / surname
- firstname / surname (patronimic)
- firstname / patronimic
- firstname / patronimic (surname)
- patronimic / surname / firstname
- surname / patronimic / firstname
- patronimic / firstname
- surname / firstname

Lots of choices... Split in 2 ?

- Order
 - Firstname / surname
 - surname / firstname
- Surname display
 - Surname
 - Surname / patronimic
 - Patronimic
 - Patronimic / Surname

History

#1 - 04/03/2012 02:57 PM - walid

On Active Directory patronimic name can be stored in field middleName (see <http://www.winvistatips.com/re-user-prefix-and-suffix-t699274.html>)

In supann it's stored in sn (see <http://www.cru.fr/media/documentation/supann/supann-en.html> and <http://www.cru.fr/documentation/supann/2008/listeattributs>)

On a regular LDAP :

sn can be multivalued (see <http://www.cru.fr/documentation/supann/2009/listeattributs>)
