

Connections - Bug #2876

1.6.0 not fully ready for GLPI 0.78+

06/16/2011 11:44 AM - elacour

Status:	New	Start date:	06/16/2011
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
Adding a new connection gives this error:			
PHP Fatal error: Class 'PluginConnectionsConnectionRate' not found in inc/db.function.php on line 290			
and forms is missing some fields and submit button.			
That's due to the need for singular forms in class names in GLPI 0.78+			
Attached patches fix this.			

History

#1 - 05/27/2014 12:39 PM - CDuv

Changes of patches attachment:0001-Rename-files-to-respect-singular-form-needed-for-GLP.patch and attachment:0002-Rename-class-to-use-singular-form-needed-for-GLPI-0..patch were applied in r7 (frankly: didn't saw these patches before commmiting r7).

However I don't get the meanings of attachment:0003-Add-missing-file.patch and the ajax/dropdownRatesConnections.php part of attachment:0002-Rename-class-to-use-singular-form-needed-for-GLPI-0..patch:

```
