**Description**

see #3043

Actual situation :

- is_faq
- entities_id, is_recursive : entity association
- profiles : knowbase / faq + anonymous FAQ (items recursive on root entity)

completly review targets management for reminders

- permit to link to users, groups, entities (recursive or not), by profile : 4 tables to link
- Need to drop fixed entity association... On creation how to manage it ? only writer can see KB item ? May permit to say in writing process is no visibility set ?
- permit to link group and entity / profile and entity
- is_faq = Visible on simple interface -> TO DROP : add all post-only profiles with read faq right

is this process for KB not so complex ? Need to create article + set visibility ?

Solution : Ok for full visibility

How to manage anonymous FAQ ? Add a visibility scheme : All / visible by all ?

Solution : is_faq + Root entity / recursive
