Target version:	Unplanned		

Description

Example :

Multientities mode (2 entities : Root Entity & Child entity)

I open a existant ticket (or other object) form of the Child entity but i'm placed on root entity (show all). I want to switch on the object entity without using entity modal dialog box (rapid link).

Solution :

Add a javascript link (icon) to launch `$CFG_GLPI['root_doc']."/front/central.php?active_entity=".$this->fields["entities_id"]` into function `showFormHeader` or directly into function `showForm` (for ticket) for automatically switch to the loaded object entity
