<b>Target version:</b>	1.6.5		

#### Description

It seems release version:1.6.3 (or previous) broke location support (the ability to associate a connection to a location).

There is no "Location" tab or dropdown on Connection item. Similarly there is a Connection tab on Location item (not sure if this would be desired though).

Such feature being quite useful (most connections are physical to a given location), planning on fixing for next version version:1.6.5 (with GLPI glpi:version:0.85 support which may bring tab management changes).
