

Generic Object - Bug #5029

New field type 'datetime' doesn't work

07/30/2014 08:58 AM - blerohellec

Status: New	Start date: 07/30/2014
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version:	
Description	
<p>I add a new field, type 'datetime': In ItemType.constant.php, I add 2 lines</p> <pre>\$GO_FIELDS['mydatetimefield']['name'] = 'Date et heure du vol'; \$GO_FIELDS['mydatetimefield']['input_type'] = 'datetime';</pre> <p>and I add field 'Date et heure du vol' in field list of the ItemType. At execution time (adding, modifying an item), the new field's label is displayed on screen ('Date et heure du vol'), but there is no field to be entered.</p>	

History

Perhaps because the only default field typed datetime is 'Last modification' and - by default - is not updateable.
