Hello

Did you plan to integrate the Plugin into the Core Functionality of GLPI ?
We updated our Test System to 0.90 and now there is an other Project Functionality.
We would like to migrate the Data to this New Project and Keep all the Relations.
We have Relations in the Project to Computers, Databases, Webapplications, Persons and Software.
Is there a Roadmap for this ?

#2 - 06/30/2016 10:43 AM - orthagh

A small fix needed i think.

In core upgrade script <https://forge.glpi-project.org/projects/projet/repository/entry/trunk/sql/core.sql>

Hello,

We use the project functionality in our company since a couple of weeks (very usefull for us). But the creation of these is very tedious, we would like to create tasks automaticly (like a template) at the begining of the project. So i seen this plugin but not compliant with our version of GLPI (0.90.1). Could you tell me if there planned to be uptodate ?

Regards,

Nicolas
