

Additional Reports - Bug #5370

Locale not translated

06/07/2015 12:20 PM - blerohellec

Status:	Closed	Start date:	06/07/2015
Priority:	Normal	Due date:	
Assignee:	yllen	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	1.9.0		
Description			
Version 1.8.0 (0.85) and previous			
In the plugin configuration, I get a list of available reports, in order to set the rights per report. The list is named 'Report' which is not translated !			
The list itself is constructed as			
Plugin - Reports			
>> Tools - Report -> Report is not translated			
>> Assistance - Statistics			
Plugin - xxx

It appears that it takes the entries from the respective report language file instead of the locale file. So for the applicationsbylocation report, if your language is French for example, you need to go to report/applicationsbylocation/applicationsbylocation_fr_FR.php and add the translation there and not just in the locale file. For the rest, you need to update your locale file to include all translations

v 1.8.1, yet to solve.

In front/report.form.php, line 68, a 'n' must be added to get_n('Report', 'Reports', 1) and manage correctly singular.

Same in line 86 of the same file (plural).

Same in inc/autoreport.class.php, even if I don't know where it is used.

I don't understand why a new msgid "Reports" has been added.
