

GLPI-PROJECT - Feature #741

Massive rename of networking ports

09/17/2006 11:31 AM - Anonymous

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Inventory	Estimated time:	0.00 hour
Target version:	previously planned as 0.87		

Description

In GLPI 0.68.1 was introduced the feature of having the networking ports sorted by name, not by number.

The ports created before 0.68.1 have a name that is not padded with 0 to the left, so now they are sorted like this:
0,1,10,11,...,19,2,20,21,22,23,3,4,5...,9.

Also, lots of them are connected to other material.

So to have the ports properly sorted there are two options:

1. Delete and create them again, connecting all the material.
2. Enter on the ports one by one and change the name.

There are some massive options for networking ports: Delete, Associate a VLAN and Delete a VLAN.

Would be nice a new Rename option.

Cheers,
Francisco.

History

#1 - 10/20/2010 01:13 PM - moyo

- Assignee deleted (8)
- Target version changed from 9 to Unplanned

#2 - 10/20/2010 01:53 PM - moyo

- Category changed from Other to Inventory

#3 - 01/18/2011 10:42 PM - moyo

- Target version changed from Unplanned to previously planned as 0.87
