

GLPI-PROJECT - Feature #962

Improve ocs rule with ipaddress parameter

11/06/2007 04:35 PM - valid

Status:	Closed	Start date:	
Priority:	Low	Due date:	
Assignee:	walid	% Done:	0%
Category:	Inventory	Estimated time:	0.00 hour
Target version:	0.71		

Description

In very rare cases, OCS agent doesn't get the network cards. The ip address, however, is still present and correct in the IPADDR field of the hardware table.

In the GLPI rules engine, if ip address is a criteria, we should check ip adress from network card and then, it's ip is not provided, get the value in the IPADDR field

History

#1 - 11/26/2007 10:43 AM - walid

(In r5968) [0.71] see #962 can use hardware.IPADDRESS for affectation rules

#2 - 01/02/2008 02:02 AM - moyo

- Status changed from New to Closed
